# How install Skype for Windows desktop
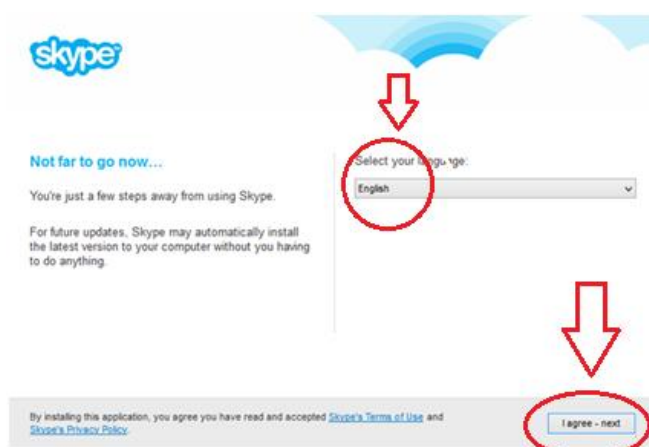

*To get started with Skype, simply download and install it.*
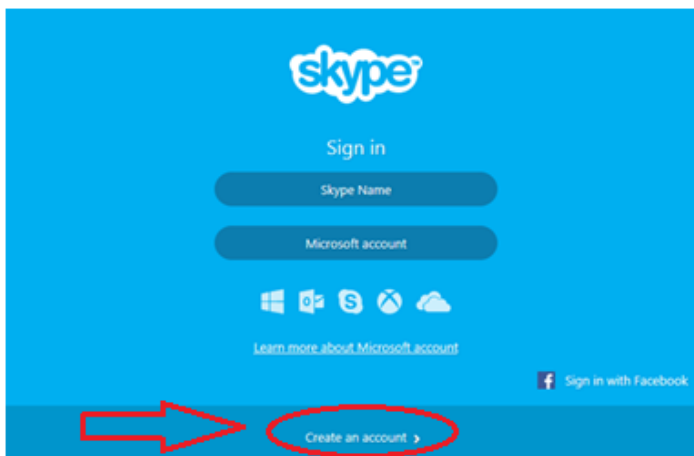

1. Go to the Skype website and click **Get Skype for Windows desktop**.
2. Save and run the Skype installation file.

   *If you get a message asking you to give Skype permission to go ahead with the installation, click **Yes** to continue.*

3. Select your language, read Skype's Terms of Use and Skype's Privacy Policy, then click I **agree – next**.

4. Read the Skype Click to Call info. If you don't want to install it, uncheck **Install Skype Click to Call** before you click **Continue**.
5. Read the Microsoft Service Agreement and Privacy Policy.
6. IF YOU DON'T WANT TO SET BING AS YOUR INTERNET SEARCH ENGINE, OR MSN AS YOUR HOME PAGE, UNCHECK THE BOXES. Click **Continue**.
7. Skype installs. When the installation is finished, you'll see the sign-in screen.

8. If you don't have an account, click **Create an account**. If you already have an account, you're ready to sign in and get started with Skype.

## To find and add CCCN.techsupport:

9. Click search 🔍 and type the name, *CCCN.techsupport*

10. Click *Search Skype*.

11. Select *CCCN.techsupport* from the search results and click *Add to Contacts*.

12. Type the following message " *I am a CCCN student in Module ...* and then click *Send*.

When you send someone a contact request, they'll appear in your contact list with a question mark ⓘ.
